

Building technology

INTEGRA
METERING

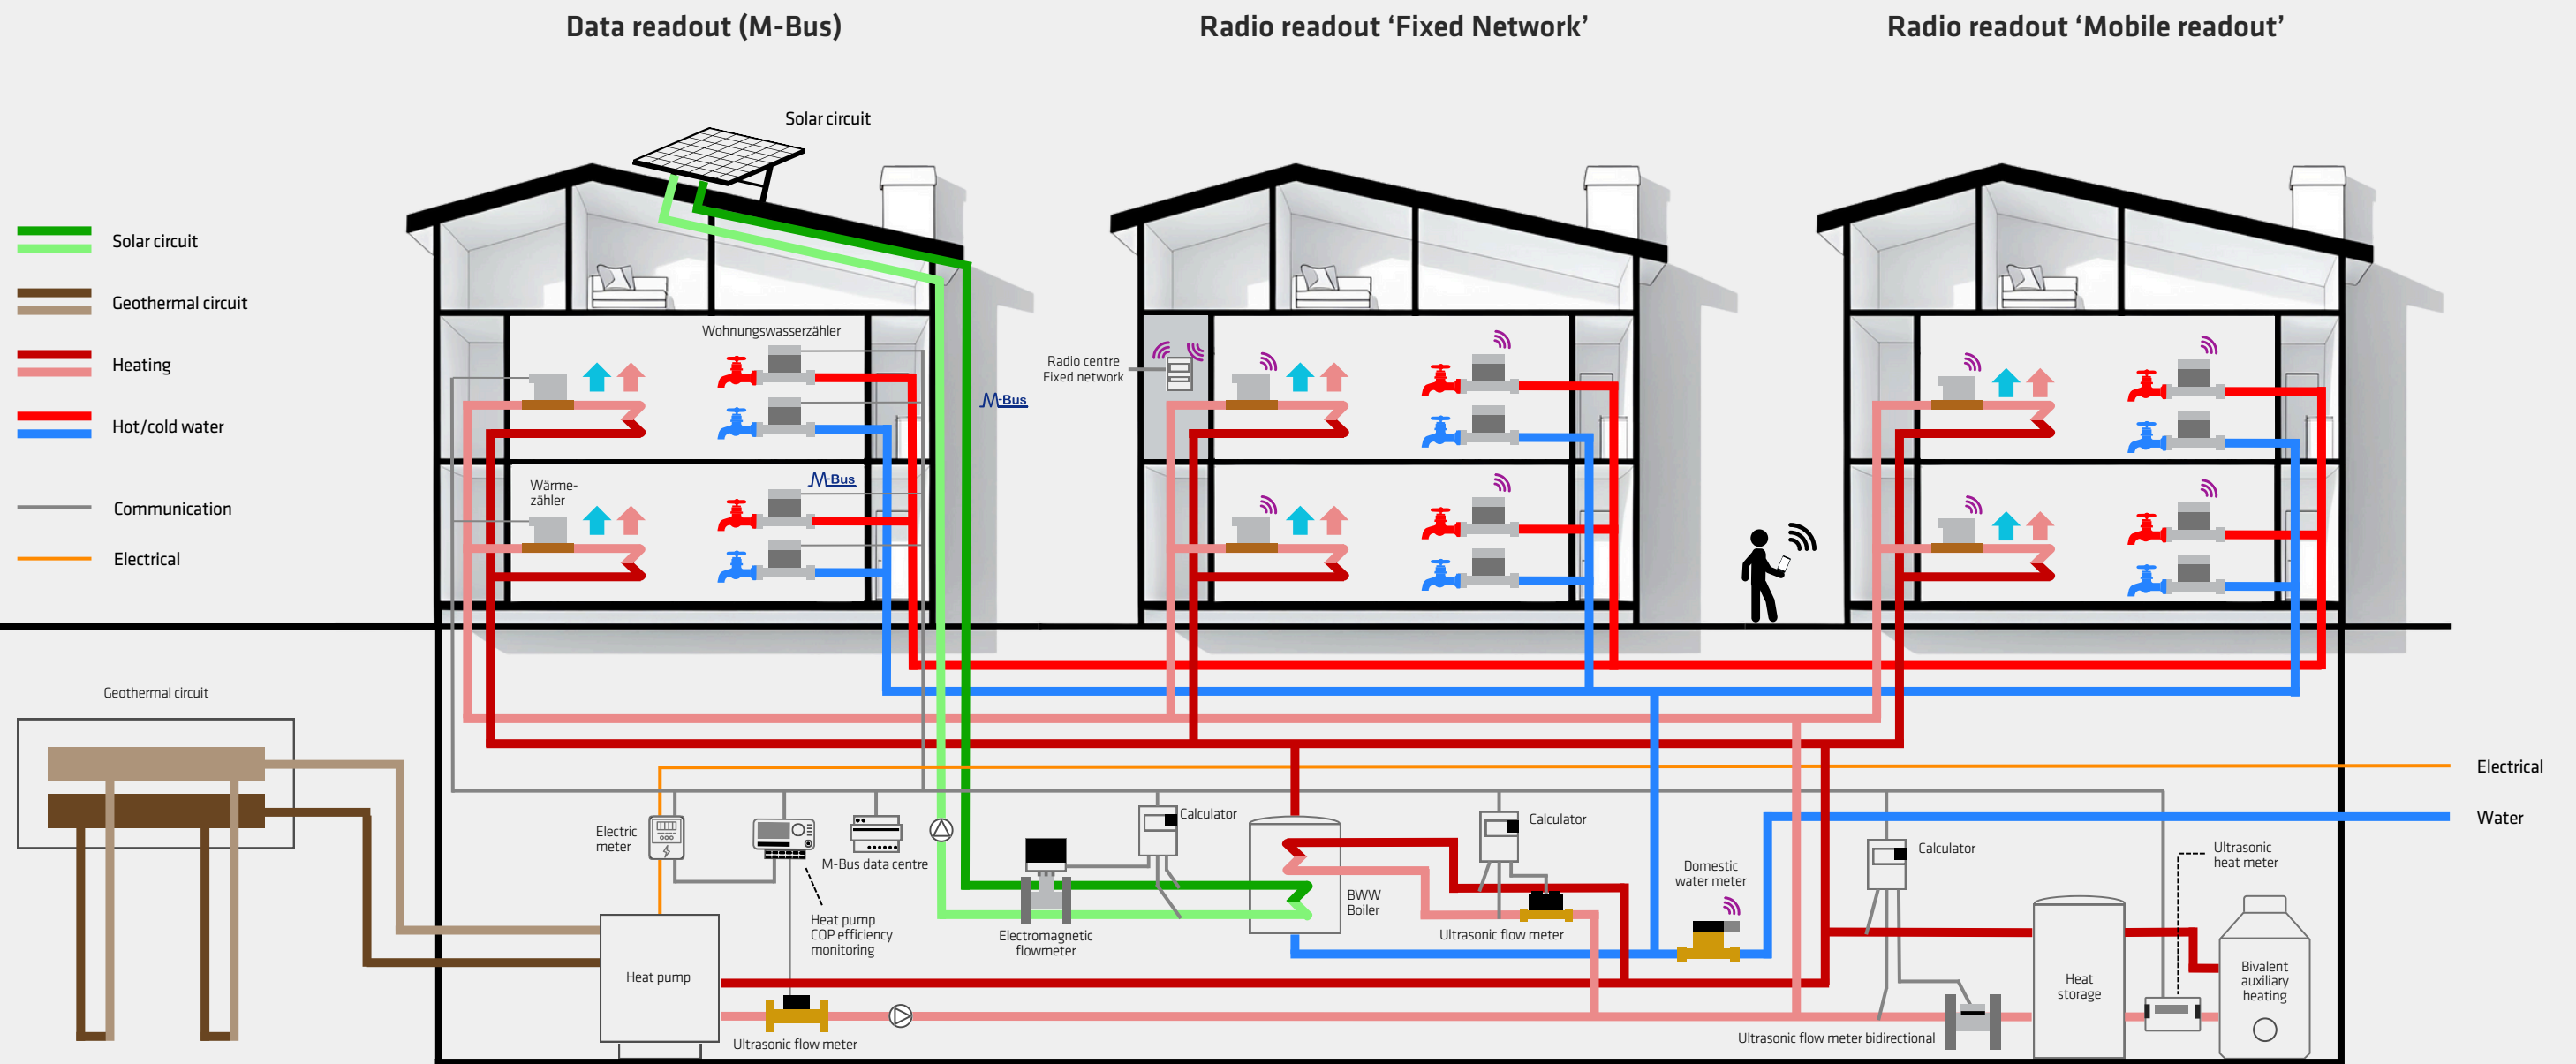

- Precisely measured and fully automatically readout of energy and water data.
- Transparent proof of consumption and efficient billing service.
- Efficiency monitoring and optimisation thanks to a comprehensive measurement concept.

Your system solution

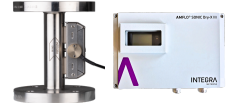

- Optimised measurement technology for complex renewable and conventional energy generation systems
- Complete system technology: measuring points, data transmission, analysis, commissioning and billing
- Readout via M-Bus or Wireless M-Bus (radio) in accordance with the manufacturer-independent OMS[®] standard

Your optimal benefit

- Measurement results with the measurement accuracy required for energy management, analyses and billing
- For products and services: Everything from a single source
- Can also be used for direct billing
- Problem-free mobile or permanent readout
- Minimised life cycle costs thanks to long service life

AMFLO® MAG Pro
Electromagnetic flowmeter

AMFLO® SONIC Dry-X III
Ultrasonic flow meter

AMFLO® SONIC UFA-113
Ultrasonic flow meter

AMTRON® SONIC D
Ultrasonic heat meter

CALEC® ST III
Multifunctional heat and cold calculator

PLH
Temperature sensors for installation of sensor pockets

AMBUS® II Portfolio
M-Bus data centre and Gateways

aquabasic® PMK
Domestic water meter with aquastream®-communication module

TOPAS® ESK2
Smart ultrasonic water meter

SAPHIR® Modularis
Residential water meter

AMTRON® S3U
Compact energy meter

aquaradio®
Mobile radio readout

Services

Comprehensive range of services

Customised and efficient maintenance models that provide you with quick and uncomplicated support. These maintenance packages include software support, handheld device replacement in the event of failure during meter reading and, last but not least, a remote maintenance licence that can prevent unnecessary effort and costs.

Heating and utility billing

As a specialist in the preparation of heating and utility billing, INTEGRA Metering AG is based on the billing model developed by the Swiss Federal Office of Energy for the consumption-based billing of heating and hot water costs. Great attention is paid both to the legal provisions and to the specific tenancy agreement.

All services are offered in a modular system. In addition to heating costs, this can also include billing for cold and hot water, waste water, electricity, cooling and all other operating and ancillary costs or the processing of payments on account.

The portfolio includes hundreds of properties, from smaller residential and commercial properties to large shopping centres. With more than 15 years of experience, extensive expertise in complex billing and the use of a modern, web-based software application, INTEGRA Metering AG is a competent, reliable and flexible partner for owners, administrations and pension funds.
